### SUBJECT: SAFETY INFORMATION FOR CIVIL PASSENGERS

---

**REASON:** The aim of this AOMB is to provide flight crews with the information that have to be transmitted to civil passengers before flight.

---

When there are civil passengers on board, loadmaster or any other person in charge has to accomplish a briefing before the flight in order to give safety information to the civil passengers related to:

1.     Seat belts.  
      Explain how to use seat belts and when to keep them fastened.
2.     Safety vests  
      Show location of safety vest and explain the procedure to use them in case of ditching.
3.     Doors.  
      Show the location of the doors and explain the procedure to open them in case it is required.
4.     Electronic devices.  
      Provide instructions about the use of electronic devices during the flight.
5.     No smoking.  
      Inform about the smoking prohibition during the flight.
6.     Supplemental Oxygen.  
      Inform about the actions to perform in case of supplemental oxygen is required.

Schematic information is additionally provided in the Safety Card included in this AOMB.
