

USE OF THE CHECKLIST:

As stated in Section III – Normal Procedures in Aircraft Operations Manual, there is a safety “CheckList” that assigns to each flight phase a minimum series of points to be checked by the crew to ensure aircraft safety and efficiency.

Once the procedure has been completed the checklist is applied.

Read-out loud each point on the checklist literally. The concerned crewmember answers as appropriate, if the action has been completed, or proceeds to complete the action before confirming it.

Keep always CheckList on the back of this page.

**AFTER USE, KEEP ALWAYS CHECKLIST
FACING THIS PAGE.**

NOTE: STATUS OF LAST UPDATED CHECKLIST IS:
REVISION 4 (OCT 21) TO ORIGINAL ISSUE (SEP 14)
